Responsible Purchasing Charter

Preamble

The Bolloré Group's Responsible Purchasing Charter describes the principles in place to ensure **ethical and sustainable commercial relationships** with its suppliers of goods and services and its subcontractors, in strict compliance with applicable laws and regulations and **the Group's commitments in terms of Corporate Social Responsibility (CSR).**

These principles reflect the Group's commitment to implementing all measures necessary to prevent and mitigate risks and any serious violations or breaches in matters of ethics, environment and human rights as related to its business activities and to optimize its positive impacts throughout its value chains and within the framework of a responsible purchasing approach.

➔ Purpose of the Responsible Purchasing Charter

To share the Group's commitments with its suppliers and subcontractors and ensure their involvement in a process for sustainable development.

The Bolloré Group thus expects from its suppliers and subcontractors strict compliance with the laws and regulations in force in the countries where they are present or provide services, as well as a commitment to collaborate with the Group for the implementation of compliance principles explained in its **Ethics and CSR Charter**, and if necessary, to take any appropriate corrective action in a process of continuous improvement.
